DETAILED ACTION

1. In response to the Preliminary Amendment filed on June 20, 2005, claims 44 and 45 have been cancelled and the claims 1-43 and 46 are pending.

Election/Restrictions

2. Restriction is required under 35 U.S.C. 121 and 372. This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1. In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

- Group 1: Claim(s) 1-11, and 23 drawn to a capping assembly comprising an overcap, a second member, and a nozzle.
- Group 2: Claim(s) 12-17, drawn to a capping assembly comprising an overcap, a second member, a seal member, and a nozzle.
- Group 3: Claim(s) 18-22 and 26 drawn to a closed container assembly comprising a container, a seal member, an overcap, a nozzle, and an insert.
- Group 4: Claim(s) 24-25, drawn to a method of closing a container.
- Group 5: Claim(s) 27-34 drawn to an assembly comprising an overcap, insert, nozzle, and seal member.
- Group 6: Claim(s) 35 drawn to a capping assembly comprising an overcap, second component, nozzle, and seal member.
- Group 7: Claim(s) 36-39 drawn to a method of providing a liquid dispensing assembly.
- Group 8: Claim(s) 40 drawn to an overcap with no perforation
- Group 9: Claim(s) 41-43 drawn to an overcap with a fluid tight seal
- Group 10: Claim(s) 46 drawn to an assembly.

3. The inventions listed as Groups 1-11 do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the common technical feature in all groups is the overcap. This element cannot be a special technical feature under PCT Rule 13.2 because the element is shown in the prior art International Publication WO 03/051734 A1 teaches the overcap substantially as claimed.

4. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
